

HARRY STACEY

FULL STACK WEB DEVELOPER

SUMMARY

A full-stack web developer based in London with an undergraduate degree in Management. I have a passion for computers, problem solving and all things tech. I have an eager attitude with every application I build, paying close attention to detail. Additionally, I am a big advocate for collaboration – teamwork at university was crucial to success and I have definitely brought this idea forward in the way I code.

RELEVANT EXPERIENCE

General Assembly, San Francisco, CA, USA

Web Development Immersive Course, Oct 2018 – Feb 2019

A 12-week intensive course, including 480 hours of teaching and daily homework assignments, covering HTML, CSS, JavaScript and React.js, as well as backend frameworks Node.js and Django. Graduation requirements included three collaborative projects and one final individual project, all of which are full stack, pushed to GitHub and deployed to Heroku.

WEB DEVELOPMENT PROJECTS

ClueForYou 2-week project, individual

<https://clue-for-you.herokuapp.com>

<https://github.com/harrystacey123/clue-for-you>

My latest project is a full stack application where users can browse, upload and share picture trivia games (I call them picture clues, hence the title 'ClueForYou'). I knew I wanted to create this application as I already had an interest in making picture quizzes, which I would send to my friends and family.

I used HTML, CSS and jQuery rather than React.js as it was what I was most proficient in at the time. There is also scope to refactor the application in React. The toughest part of the project was building the back-end with relatively little help including full CRUD functionality, as this was my first individual full stack project – but I'm incredibly proud of what I have achieved.

Technologies used: HTML, CSS, jQuery, Node.js, Express, Mongoose, MongoDB, Multer, EJS.

SKILLS

HTML	CSS/SASS	JavaScript
jQuery	React.js	Express
Mongoose	MongoDB	Node.js
Python	Django	APIs
Trello	Flexbox	Slack
Postman	GitHub	Git
Heroku	NPM	Gulp

EDUCATION

General Assembly, San Francisco

Oct 2018 – Feb 2019

Web Development Immersive Course

University of Exeter, UK

September 2015 – June 2018

BA in Business and Management, Upper Second Class graduate degree (2:1)

King's School, Canterbury

September 2009 – June 2014

A-levels: Physics (A), Economics(A), Maths (B)

WEB DEVELOPMENT PROJECTS

Wayfarer I-week project, group of 3

<https://react-wayfarer-front.herokuapp.com/>

<https://github.com/bmanandhar/project-wayfarer>

Wayfarer is a travel blog. Users can create an account to upload and share a photo and description of their favourite destinations around the world. For my first MERN stack (MongoDB, Express.js, React.js & Node.js) application, my contributions included authentication and authorisation, styling, and 'create' & 'read' of the CRUD functionality, to name a few.

Technologies used: HTML, CSS, React.js, Multer, Bootstrap, Node.js, Express, Mongoose, MongoDB.

Learnify I-week project, group of 3

<https://learnifyly.herokuapp.com/>

<https://github.com/addison912/learnify.ly>

Learnify is an online learning platform where users can create an account to upload their own video tutorials, as well as browse and purchase current tutorials on the site, on topics ranging from cooking to coding. I worked on both the front and back end, including constructing all the forms on the site, as well as implementing Django's authentication and authorization.

Technologies used: HTML, CSS, jQuery, Django, Stripe, Pillow, and Psycog2

INTERESTS

-  Skiing
-  Creating trivia games and quizzes
-  Fishing
-  Watching Cricket
-  Watching Football

VOLUNTEERING

Heart Orphanage - Malindi, Kenya

General Helper

Dec 14

-  Tasks included cooking for the children, as well as purchasing the food from the market.
-  Assisting with the construction of a new building, which was later turned into a new dormitory.
-  Playing with the children during break times as well as helping them with their school work.
-  Teaching English to the children (Swahili being their first language).

EMPLOYMENT

Saunders Park Homes LTD

Ramsgate, Kent

Account Manager

Jun 18 – Oct 18

-  Assisted approximately 50 guests per day, checking them in or responding to their queries or complaints through vast knowledge of the park and surrounding area.
-  Worked closely with the General Manager and Chief executive during most days ensuring the running of the park was as smooth as possible.
-  Tasked with creating and styling entertainment posters for upcoming events, which would then be emailed to all guests – this would ensure the evenings are kept busy in the park's Clubhouse.

Mahiki

Henley-on-Thames, Oxfordshire

Bartender/Waiter

June 2017

-  Served approximately 500 customers over the 4-day Henley Regatta at the annual Mahiki pop-up bar.
-  Our team helped generate more than £500,000 in revenue for Mahiki over the 4-day festival.
-  Maintained morale and a positive attitude with 15 hour shifts.
